EDUCATION

B.Tech (Electronics and Telecommunications)

Prof. Ram Meghe Institute of Technology and Research

📅 2024 - 2028

SUMMARY

I am an Electronics and Telecommunications engineering student with a strong interest in renewable energy systems, particularly solar power technologies. I have foundational knowledge of electronic circuits, power electronics, PV systems, and communication systems. I am eager to apply my technical skills in real-world solar projects, including solar panel installation, system testing, performance monitoring, and troubleshooting. I am a quick learner, motivated, and enthusiastic about gaining hands-on experience in sustainable energy solutions while contributing effectively to the organization.

SKILLS

Problem Solving Team Work Leadership

Communication Skills Critical Thinking

INTERESTS

💎 Interested in roles involving power electronics and circuit design.

👍 Motivated to learn and work with energy management and smart monitoring systems.

🚀 Interested in combining E&TC skills with solar technology and sustainable solutions.
